Talent Management Resolved Issues Report
Talent Management 23.07

Introduction

PeopleFluent is pleased to announce the upcoming 23.07 update of Talent Management. This document provides information about issues resolved in this update.

Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

Revision Information	
Revision Date:	June 23, 2023
Document Version Number:	1.0
Details of Revision:	Initial publication.

Issues List

The following table includes the client-reported and internally-found issues addressed in this release. In this document, we provide only a description of the issue that was resolved in cases where the affected functionality now works as expected. We provide the description and additional detail when a resolution causes a change in system behavior, user experience, or performance.

We do not report issues that we cannot reproduce, or those that were the result of a specific customer's configuration or misunderstanding of functionality.

Table 2: Issue Descriptions and Resolutions

Application	Ticket IDs	Internal IDs	Issue Description
Common	342688	PTMSD-3285	Error when running Talent Profile Statements.
Common	Internally found.	PTMSD-3321	On the Data File Processing page, clicking Process Plan Update without saving gave a generic internal server error. Now there is a more descriptive error message.
Common	Internally found.	PTMSD-3414	Productivity Platform My Development Activities widget shows a blank bubble for Competencies associations when clicking the blue number. This is resolved by an update to Microapps v1.11.1.
Compensation	Internally found.	PTMSD-3263	Delete Tasks and Regenerate Tasks buttons for Off-Cycle should not appear.
Compensation	342246	PTMSD-3271	Users get error running award statements.
Compensation	Internally found.	PTMSD-3297	Error when generating non-pre-generated PDF statements.
Onboarding	Internally found.	PTMSD-3247	Access Denied message when attempting to insert a merge field into an Onboarding task template description.
Performance	338720	PTMSD-3162	Multi-Rater Aggregate form print is not formatting correctly.
Performance	340201	PTMSD-3205	Clinical competency raters could not access Performance competency data in the Competency Assigned, Competency Results, and Competency Profile grids. Clinical competency raters can now access competency data for library competencies of type 'Clinical' in those grids and reports.
Performance	342259	PTMSD-3266	Clinical competency raters could see Anytime, Anywhere Feedback data. The Clinical Competency Rater AoR is now restricted from seeing data under My Team grids, including Feedback. This also includes the Positions, Calibration Rankings, and Calibration Summary grids.

Application	Ticket IDs	Internal IDs	Issue Description
Performance	342348	PTMSD-3280	Editing development activities produced an error on Productivity Platform.
Performance	341801	PTMSD-3293	Cascaded goals to employees lock down the OBG Measurement field. The Talent Management Pseudo Model has been equipped with the generateNewPerformanceGoalResults method, which enables the generation of measurement periods according to the calendar associated with the goal.
Performance	Internally found.	PTMSD-3329	Cascading Goals throws exception when cascading Different Goals Based on Performance Groups and adding the performance group value.
Performance	345155	PTMSD-3366	Slowness on initial load of clinical evaluation Select Employee page. This was due to the lengthy sorting process on the name column. To address this, a new view was added for the grid, and the default sorting for the name column has been removed. As a result, the grid will no longer be sorted by the name column by default and the page loads much faster.
Recruiting	339942	PTMSD-3183	External job postings showing on internal job board. The Job Openings widget will now search for only internal job postings by default. Employees can still see external postings if they go to Advanced Search and clear the 'Search for internally posted jobs only' check box. If this check box is configured to be not visible, it will default to selected (search for internal jobs only). For saved searches, if the 'Search for internally posted jobs only' check box is Not Visible or Read Only, it will default to selected.
Recruiting	339803	PTMSD-3186	Candidate processing failure.
Recruiting	340505	PTMSD-3204	Multiple offer approval emails are sent to the same approver. When an approver was deleted, the current level approver was notified each time an approver of any level was deleted. Now only the next level approver gets notified when a current level approver is deleted.
