Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

| Revision Information | |
|----------------------------------|-----------------|
| Revision Date: | May 15, 2026 |
| Revised Document Version Number: | 1.0 |
| Details of Revision: | Initial Version |

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

| Zendesk Ticket IDs | Internal ID | Issue Title | Issue and Resolution Details |
|--------------------|-------------|--|--|
| 385040,385113 | NSD-10624 | R139 issue with the module status after the valid for period expired | There was a minor issue in the R139 report that would incorrectly show a module as being completed after the validity period for the module against the competency. The issue was caused when an earlier enrollment was completed, but there were later enrollments where the user was withdrawn. This has been corrected to show the correct module status. |
| 383770,385107 | NSD-10607 | Minor language key issue on R139 report. | A minor language issue was created in 25.10.3 using "Deadline Expired" instead of "Expired" when fixing a defect. This is corrected to use the "Expired" language string. |
| 384208 | NSD-10605 | Issue with R139 | The R139 was not showing the |

| | | | |
|--------|-----------|---|---|
| | | report not showing competency expiration correctly | expiration of some competencies, this was corrected with a change to how the report retrieves the expiration dates from the database. |
| 383987 | NSD-10577 | Competency expiry dates were sometimes missing or not displayed correctly in the UI, especially after data imports or course substitutions. | The competency expiry date display issues were related to data synchronization, import processes, and the handling of substitute courses. To resolve this issue, substitute course expiry info is hidden in the UI when it is outdated or incomplete. As part of this fix module expiry dates will be excluded from R139 reports when they were not relevant or available - based on the same criteria for hiding the date in the UI. |
| 383606 | NSD-10506 | Issue with capitalization of Exam ID in Exam Data Loader | The Exam Data Loader will force the Exam ID to be all uppercase when using the loader to add an exam. However, there are instances with some older customers where existing exams has mixed case (Exam_Id), and there are issues when using the Exam Data Loader to with the update action. There are also issues on the Exam Listing page when there are exams with mixed case IDs. These issues have been corrected. |
