New to PeopleFluent Learning LMS

PeopleFluent is pleased to announce the PeopleFluent Learning 23.07.1 update. PeopleFluent Learning 23.07.1 was released for general availability on 8 August, 2023. If you are a hosted (SaaS) customer, please contact your PeopleFluent Customer Success Manager to request a schedule for upgrading your sites.

This documentation describes the functionality changes in PeopleFluent Learning 23.07.1, including new and deprecated features. If you have any questions about the enhancements or the new features, please contact your PeopleFluent representative.

Resolved Issues

PeopleFluent Learning 23.07.1 includes a number of bug-fixes and you are encouraged to review them in the Resolved Issues Report.

Document Information

This section lists any changes or updates that occur following initial publication.

Table: Revision Information

Revised Document Version Number:	1.0
Details of Revision:	Initial publication

Summary of Enhancements

The features and enhancements described in this documentation apply to PeopleFluent Learning and will be available when the customer is upgraded to this version.

Because PeopleFluent Learning is configurable per customer, new features may affect each customer's individual implementation differently. For more information about any new feature, and how it can be used in specific implementations, contact your PeopleFluent representative.

This guide is not a tutorial, although some background explanation is provided for each of the key features to better appreciate how these might affect your organization.

The following new features are included in PeopleFluent Learning 23.07.1:

- Exam Enhancements
 - Record Post-Completion Attempts & Higher Scores
- Additional Enhancements
 - Clean-up AICC Communication for Proxy Launch Exams

Exam Enhancements

Record Post-Completion Attempts & Higher Scores

As of 22.11, when an exam is completed (passed), learners can access the exam and answer questions, but those answers are not recorded. The change will allow administrators to designate whether or not to record additional answers, as well as whether or not to allow a higher score to be recorded.

Availability Properties

Allow download

Allow candidates to resume incomplete attempts Allow candidates to print exams

Disallow abandonment of a resumed exam?

Record Post-Completion Attempts Record Post-Completion Higher Score

Not available before:

Not available after:

Participants cannot retake exam within of last attempt.

- Record Post-Completion Attempts - This would enable recording the attempts in the appropriate database tables (testinstance. testquestion#, etc).
- Record Post-Completion Higher Score - This would allow the exam score to be updated if the post-completion attempt has a higher score, but would not update if the attempt has a lower score. While this checkbox could be selected without the other setting in the exam editor, a higher score will not be recorded if the attempt itself is not recorded.

Additional Enhancements

Clean-up AICC Communication for Proxy Launch Exams

When a module is configured to launch an exam, it can also be exported as a Proxy Launch Package that can be imported into another LMS. This allows PeopleFluent Learning to use AICC functionality to send applicable information to the other LMS. However, because launching an exam brings up a start page, there are changes that need to be made to account for this.

The changes are:

- Sending `lesson_status=incomplete` when an exam starts.
- Sending `exit=suspend` when abandoning an attempt in the middle and `exit=` without a value when the attempt completes (pass or fail).
- Sending `lesson_status=failed` and a new `lesson_status=incomplete` when a user decides to start over instead of completing a previously abandoned attempt.
