

PeopleFluent Learning Resolved Issues Report

PeopleFluent Learning 23.07.4

Introduction

PeopleFluent is pleased to announce the upcoming 23.07.4 update of PeopleFluent Learning. This document provides information about issues resolved in this update.

Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

Revision Information	
Revision Date:	November 16, 2023
Revised Document Version Number:	N/A
Details of Revision:	N/A

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

Zendesk Ticket IDs	Internal ID	Issue Title	Issue and Resolution Details
351517	NSD-9114	Cloning an exam with a long ID caused issues.	The Exam ID field has a limit of 85 characters, and when cloning an exam the process adds seven characters, a dash followed by six numbers (-#####). So if the Exam ID was already long, such as from repeated cloning, this would cause problems with creating the clone. The fix will trim characters from the existing ID to allow the clone to take place. Customers may wish to use the Migrate Exam ID before cloning the exam.
349767	NSD-9106	Password was missing in new user welcome email.	When the default password was set in <code>ekp.properties</code> , the New User Welcome Email was did not include the password. This has been fixed.
350032	NSD-9077	Session attribute	When an admin is editing a session and has Read Only permission for a Session Attribute, the WYSIWYG editor is disabled to permit the existing

	value not saving correctly.	value being retained when the admin saves changes to the module/session.
