

PeopleFluent Learning Resolved Issues Report

PeopleFluent Learning 23.11.4

Introduction

PeopleFluent is pleased to announce the upcoming 23.11.4 update of PeopleFluent Learning. This document provides information about issues resolved in this update.

Document Revision

This section lists the initial publication and any changes or updates that follow.

Table 1: Revision Information

Revision Information	
Revision Date:	June 03, 2024
Revised Document Version Number:	1.0
Details of Revision:	Initial Publication

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

Zendesk Ticket IDs	Internal ID	Issue Title	Issue and Resolution Details
356187	NSD-9310	Reporting query optimization.	Loading all permission data of an object type sometimes could be slow when the database is large. This was changed to use the cached permission map.
357822	NSD-9395	Exam display issue in transcript details.	There was a display issue on the transcript details when an exam module was set to record in percentage. This did not affect the actual score or pass/fail for the exam itself.
358588	NSD-9419	Issue with program completion and "share/credit" functionality.	A minor glitch was introduced in 23.11 when a program is initially set to 'Requires the learner to retake the learning' but is changed to 'Does not require the learner to retake the learning' after learners were re-enrolled. The glitch would mark the program complete but leave the modules as not started, but this has been corrected so the parent remains not started.
359795	NSD-9433	Issue	There was a runtime error generated on the content server under

		launching content on a content server.	certain circumstances. This has been corrected to allow the correct functioning of content from the configured content server.
