Revision Information	
Revision Date:	July 09, 2026
Revised Document Version Number:	1.0
Details of Revision:	Initial Version

Issues List

The following table includes the client-reported and internally-found issues addressed in this release.

Table 2: Issue Descriptions and Resolutions

Zendesk Ticket IDs	Internal ID	Issue Title	Issue and Resolution Details
379614	NSD-10449	Approved prog enrolments are being updated to denied after the approval expiration period is exceeded	Due to some status change action to bypass the enrollment approval process, the existing step would still run its expiration course, this has been prevented.
382269,383881	NSD-10538	Session titles not appearing on the Session Administration screen.	There were intermittent issues for users viewing session titles on the Teach > Session Administration screen.A fix has been added to retrieve the session title if the one in the index can't be retrieved or is blank.
385231	NSD-10647	Issue opening Questions with a period in the ID	In 25.10, there was security update related to the Content Security Policy header.That change caused a

		from the Exam Review page.	downstream issue in the Exam Review page where Questions with periods in the IDs were mistakenly treated as CSS selectors, and not opening when clicked.This has been corrected.
385424	NSD-10661	Issue with Programs that have more than 50 submodules.	Some customers were reporting an issue for Programs with more than 50 submodules, where some submodules were not being saved correctly when changes or additions to the submodule list were made.This has been corrected.
413027	NSD-10673	Issue with SCORM Course interaction fields.	Rustici Engine supports limits of SCORM 2004 cmi.interactions.n.correct_responses. n.pattern & cmi.interactions.n.learner_response data model elements that are beyond our current schema support. The interim fix is to truncate them to 1000 characters, if the response is larger, to prevent the update encountering exception an failing to record the update. This limit will remain until the schema is officially expanded to support them in 26.10.
385655	NSD-10686	Minor issue with question attachments.	The question attachment functionality could encounter an error when the exam is configured to allow section/question navigation and the section is configured for single question per page. This has been fixed.
385335	NSD-10688	Tomcat issue caused a minor issue with the courses API.	The Courses API used by the New UI pages had a minor issue that was caused by a bug fix in Tomcat, resulting in a "No converter" error.This has been corrected.
412869	NSD-10704	Issues with Enrollment Approval	Some status change action could potentially bypass the enrollment approval process, and if the approver backdates the approval, an exception could occur, this has been fixed.
413146,413403	NSD-10712	Issue with R139 Report	When users were re-enrolled in previously completed modules, and those previous completions were still

		within their validity period, the R139 report was showing the status for the new enrollment. The report has been fixed to show the completed and valid enrollment.
