Revision Date:	July 28, 2022
Revised Document Version Number:	1.0
Details of Revision:	Initial publication.

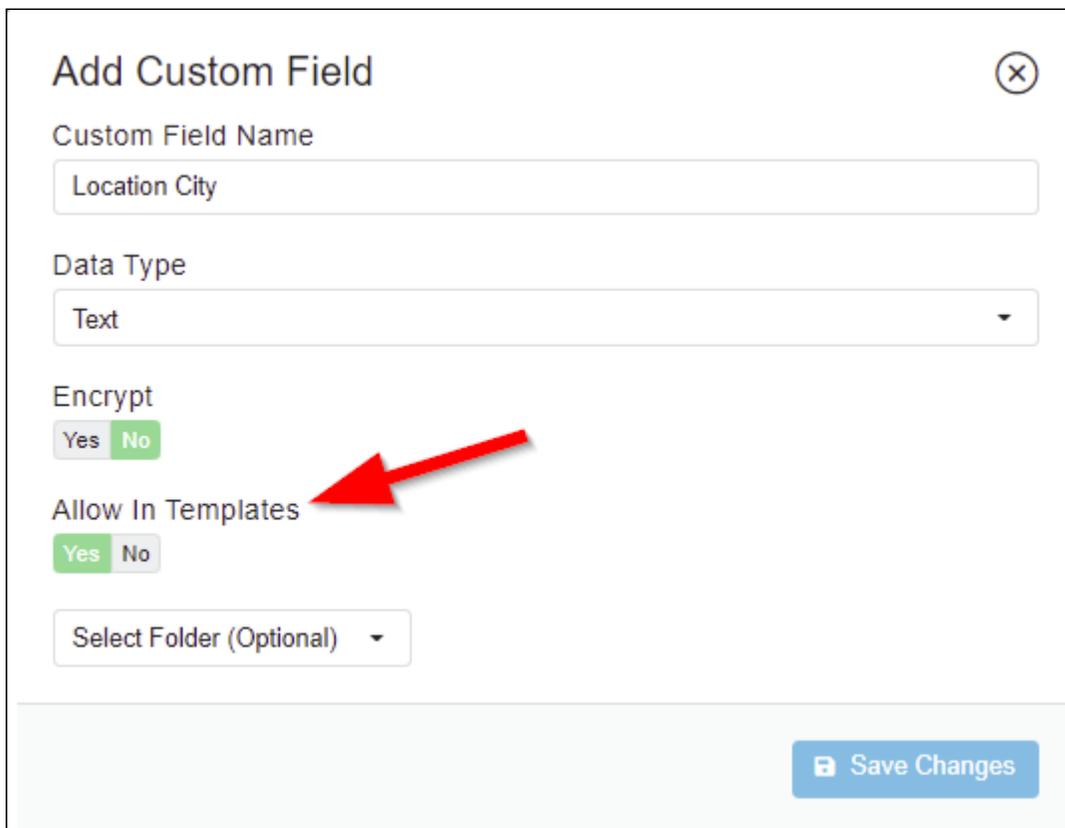

Custom Fields in Templates

Summary

This enhancement allows custom fields to be added to email and SMS templates.

Details

When creating or editing a custom field, a new **Allow in Templates** field displays. This field allows you to determine if the custom field should be available for insertion into email and SMS templates. Toggle to **Yes** to allow the custom field to be selected in a template.

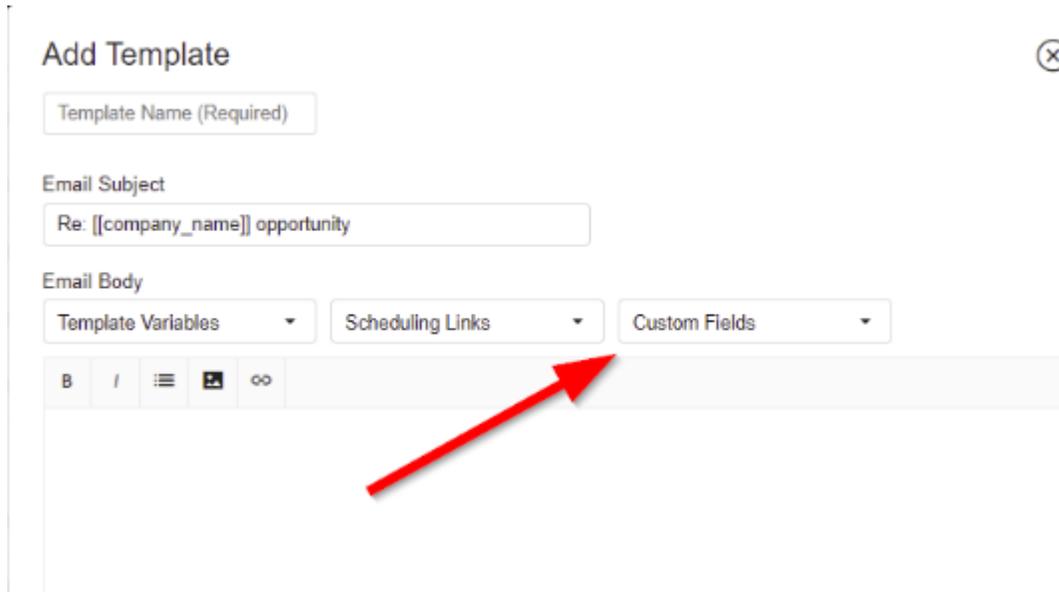

The screenshot shows a dialog box titled "Add Custom Field" with a close button in the top right corner. The dialog contains the following elements:

- Custom Field Name:** A text input field containing "Location City".
- Data Type:** A dropdown menu currently set to "Text".
- Encrypt:** A toggle switch with "Yes" selected (highlighted in green) and "No" unselected.
- Allow In Templates:** A toggle switch with "Yes" selected (highlighted in green) and "No" unselected. A red arrow points to this toggle.
- Select Folder (Optional):** A dropdown menu.
- Save Changes:** A blue button with a floppy disk icon and the text "Save Changes" located at the bottom right of the dialog.

Figure: Toggle for allowing custom fields in templates.

Custom fields that have been enabled for templates can then be inserted into email and SMS messages. When creating or editing a template, simply select the field name from the drop-down list and that field will be inserted into the body of the message. When the email or SMS is sent, the appropriate value for the field will be displayed in the message.

The screenshot shows the 'Add Template' interface. At the top left is the title 'Add Template' and a close button (X) at the top right. Below the title is a text input field for 'Template Name (Required)'. Underneath is the 'Email Subject' section with a text input field containing 'Re: [[company_name]] opportunity'. The 'Email Body' section contains three dropdown menus: 'Template Variables', 'Scheduling Links', and 'Custom Fields'. A red arrow points to the 'Custom Fields' dropdown menu. Below the dropdowns is a rich text editor toolbar with icons for bold (B), italic (I), list (☰), link (🔗), and unlink (🔗 with slash), followed by a large empty text area.

Scheduling from a Pool of Recruiters

Summary

Candidate interviews can now be scheduled to pull in a single recruiter from a pool of available recruiters.

Details

When setting up an interview scheduling link to send to a candidate, you can now designate if the call should be pulling in a single recruiter or multiple recruiters. Use the **Interview Panel/Pool** toggle switch to determine which type of call you want to create:

- **Panel** - When a candidate selects a date/time for the interview, all recruiters added to the scheduling link will be invited to the call to conduct the interview in a "panel" format. The list of dates/times that are available for a candidate to choose will account for all of the invited recruiters availability.
- **Pool** - Only one available recruiter out of the pool will be scheduled for the interview once the invitation is accepted by the candidate. The scheduling link sent to the candidate will display available interview dates/times when one of the recruiters in the pool is available.

Scheduling Link (X)

Customize your meeting criteria in advance and let the candidate pick the right time based on your predefined preferences.

Use them with Stage-Actions, emails, SMS/text messages and more!

Supported Browsers

To provide security and the best performance to our users, PeopleFluent clients are recommended to follow our Browser Support policy to access all PeopleFluent applications.

Unsupported older browser versions may have rendering or compatibility issues. When such issues are reported, PeopleFluent will attempt to recreate on fully supported browser versions and in the event this cannot be replicated, the remedy will likely be a recommendation for clients to upgrade to a supported browser.

Microsoft Edge (latest stable release)

PeopleFluent supports the latest stable release of Microsoft Edge browsers in accordance with Microsoft's support policy.

Mozilla Firefox (latest stable release)

PeopleFluent supports Firefox's latest stable release channel. PeopleFluent's support also extends to Firefox's specialized Extended Support Release (ESR). For Mozilla Firefox release notes, go to:

<https://www.mozilla.org/en-US/firefox/releases/>

Google Chrome (latest stable release)

PeopleFluent supports Chrome's latest stable release from Google Stable Channel. For Chrome release updates, go to:

<https://googlechromereleases.blogspot.com/search/label/Stable%20updates>

Apple Safari

PeopleFluent supports Apple's latest version of Safari browsers on Mac OS X and iOS.

Known Issues and Limitations

PeopleFluent requires the latest patches be installed for all supported web browser versions.
